Hens

MUST EAT

During fall months a leghorn will need six pounds of feed to make one dozen eggs

. . . and that is not all. If she is to produce all the eggs her body was built to make, she must have good feed, fresh water and clean quarters every day of every month.

The Southern States feeding program will provide your birds with freshly mixed, properly balanced, palatable mash and clean, wholesome scratches from top-grade feeding grains. If you follow the directions on the open formula tag, your hens will put out their full share of eggs this fall and winter.

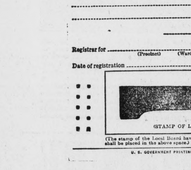
WATERMELON QUEEN



Apparently queens don't mean much in New York city. Six-year-old Virginia Collins, "Queen of the Watermelon Festival," eyes with envy the huge chunk of melon being devoured by five-year-old Oscar Bullock, winner of the watermelon-eating contest.

English Princess Breaks Precedent With Marriage

It is difficult today to realize what an unorthodox thing Princess Louise did when she was married to the marquess of Lorne in 1870. Princess Louise, who died late in 1939, was a daughter of Queen Victoria. No princess of an English reigning house had married out of the royal caste since 1515, when Henry VII's daughter became the wife of the duke of Suffolk. It is curious to read that the marriage to Lord Lorne, son and heir of the duke of Argyll, was strongly opposed by her brother, the prince of Wales, late King Edward VII, while Queen Victoria herself favored the match. One might have expected quite the opposite reaction. But perhaps Disraeli's courtly reassurance, "You will miss her, madam, like the stars: that return in their constant season, and with all their brightness," had its effect.

Two familiar legends are associated with the royal match, writes Observator in the London Sunday Observer. One is the tale of the Averagy clansman (who counted no one higher than the duke of Argyll). "The queen will be a proud woman the day," he said. The other was the encouraging effect which the marriage is said to have had on the sale of the novel "Lorna Doone," published in the previous year.

War Earnings

How hostilities affect corporate income—at least in the last World war—is indicated in a study by Fuller, Rodney and Remond, which shows that aggregate net income of 68 industrial companies rose from $208,000,000 in 1914 to $375,000,000 in 1915, $803,000,000 in 1916 and then to $533,000,000 in 1918.

This If News

It's no longer news when man bites dog.

But when dog collides with car—

Walter P. Smith, 55-year-old mechanic of Seattle, had a new one for the books.

He told police he was driving his car when he spotted a 90-pound collie dog traveling at a fast clip—and on Smith's side of the street.

Smith stopped his vehicle and waited for the dog to pass. Instead, the animal crashed head on into the car, smashing the grill and radiator.

Authorities Say 1,380 Local Men to Register October 16

Authorities in Richmond estimate that a total of 1,380 men should register in Appomattox county October 16, under the Selective Service Act. On that date, all men between 21 and 36 must go to voting precincts and register. Heavy penalties are provided for those who fail to register.

Local authorities state that the 1,380 estimate seemed high for Appomattox county. In 1917, Appomattox registered 686 men in the first draft, the ages then being 21 to 31. However, a determined effort will be made to see that word of the compulsory Registration reaches all persons. The county electoral board will meet with precinct officials at the court house next Thursday to lay final plans for Registration Day.

The Selective Service authorities estimate that Buckingham county will register 2,193 men, Charlotte 2,649; Cumberland 1,242; Campbell, 3,765; Prince Edward 2,385.

For detailed information on the Registration, see special statement on Page Five.

Wolves Scarce

Predatory animals appear to be scarcer than usual in the Goodpaster country and game seems to be normal in the quantities, according to J. W. Thompson, veteran trapper of Alaska.

"I brought only one predator hide for a bounty," he declared. "The hide is that of a coyote. I didn't see tracks of many wolves or coyotes in the past winter.

"The big game in the Goodpaster district consists of moose, bear and caribou. The occurrence of these animals at present is normal.

"On my way I saw a band of 40 caribou. They stood the winter well.

"Mining will be active this season on the upper reaches of the Goodpaster."

Masten Stages Come-Back

Once almost extinct in the Rockies, the elusive marten, a pride of the early day trappers, is staging a strong come-back in the park, Naturalist Raymond Gregg has reported.

Under the protection of the national park service, the fur bearing animal has multiplied its numbers many times since the establishment of Rocky Mountain National park in 1915, eliminating activities of trappers in the area.

While usually making forays on smaller animals at elevations from 8,000 to 10,000 feet, marten have been observed on the summit of Longs peak, 14,235 feet high, in search of coneys, small rodent-like mammals making their homes in talus slopes above timberline.

The circuit court of Appomattox county convened here Tuesday for a October term. Only 2 indictments were returned by the grand jury, and the entire criminal docket was cleared that afternoon, when one or the two cases was continued, and in the second case, the defendant was given suspended sentences in return for leaving the state of Virginia for 10 years.

Announce Deal For Sale Of Water System

A. R. Harwood Purchases Water Company, As Of October 1

The W. M. Hancock Company, owners of the water system serving the Town of Appomattox, yesterday announced the completion of a deal whereby the company is acquired by A. R. Harwood. The price of sale was not announced.

The Hancock water service began in 1933. The late Walter M. Hancock in that year drilled a well to service his ice plant. Exceptionally good artesian water was found, and in 1924, the original wooden water tank (now used as the Round House service station) was put up. Dr. D. N. Twyman entered into partnership with Mr. Hancock in piping water to a number of residences on the south side of the railroad.

In 1927, a 38,000 gallon metal water tank was installed. The growth of Appomattox increased the demand for water supply, and many additional pipe lines were put in, until today there are some 200 customers.

Mr. Hancock died in 1935 and Dr. Twyman died this year. The Hancock estate announced that the sale to A. R. Harwood is effective as of October 1, 1940.

Mr. Harwood is one of Appomattox's most progressive business men. He is cashier of the Farmers National Bank and an official of the Appomattox Hardware Company, Inc.

Walker, of Rockbridge and F. R. Walker, of Richmond; two aunts, Miss Ida Jones and Mrs. Belle Payne, of Appomattox and a number of neices and nephews.
